EDUCATION

The University of Toledo | Toledo, Ohio

B.S. in Computer Science & Electrical Engineering (Dual Degree) | Senior | Anticipated Graduation: Spring 2027

Awards: *Dean's List, Fall' 25 Academic Student Research Award*

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, C, C++, MATLAB, HTML, CSS, JMP

Cloud & Systems: Azure Fundamentals, Active Directory, Microsoft Intune, Entra ID, SCCM, OS Imaging, RDP, Network Security, Linux

Tools: Git, GitHub, VS Code, SPICE, SolidWorks, Microsoft Office, Power BI

EXPERIENCE

First Solar – Manufacturing Integration Intern | Perrysburg, OH | Sept 2023 – Dec 2023

- Improved reporting efficiency by 40% by developing Python automation to track daily manufacturing data from JMP/SQL into Excel and PowerPoint reports.
- Increased defect identification speed by 25% by analyzing scrap data, identifying trends, and proposing actionable solutions with cross-functional teams.

First Solar – Manufacturing Integration Intern | Trinity, AL | June 2024 – Dec 2024

- Enhanced workflow efficiency by 35% by writing JMP/SQL scripts and automating daily operations tracking.
- Strengthened team communication by delivering daily presentations, improving clarity and decision-making speed.
- Contributed to a 15% reduction in recurring issues by monitoring scrap data and collaborating with engineers on reporting and interface improvements.

University of Toledo ECC – IT Help Desk Assistant | Toledo, OH | Aug 2022 – Present

- Provide technical support for desktops, printers, mobile devices, and software across academic and administrative departments. Resolved 40+ technical support tickets each semester.
- Deploy and maintain OS images, assist with system maintenance, machine refreshes, and user onboarding for new IT tools.
- Reduced downtime by 20% by troubleshooting and implementing effective technical solutions.

Undergraduate Research Assistant | Toledo, OH | Mar 2025 – Dec 2025

- Conducted undergraduate research on Plasma Activated Water for Urinary Sepsis, supporting RF system experiments, plasma diagnostics, literature reviews, data collection, and technical documentation under Dr. Abbas Semnani.

TECHNICAL PROJECTS

- **Chef-Bot (AI Chatbot):** Developed a full-stack AI recipe assistant using React, Node.js, Express, and OpenRouter API that generates recipes from available ingredients through conversational prompts.
- **PlantPal – Smart AI Plant Care (Group Project):** Developed a full-stack IoT plant monitoring platform using ESP32 sensors, React, Express, Supabase, PostgreSQL, weather APIs, and AI-generated plant care recommendations with automated email alerts.

COLLEGIATE ACTIVITIES & LEADERSHIP

Phi Sigma Rho – STEM Sorority | Jan 2025 – Present

- Serving as Fundraising Chair, Apparel Chair, and Director of Recruitment. Planned and executed Recruitment Week by coordinating campus outreach, classroom presentations, local business partnerships, logistics, and promotional campaigns, resulting in one of the organization's strongest spring recruitment seasons.

University of Toledo Engineering Council (UTEC) – Event Management Committee | Jan – Dec 2023

- Planned STEM outreach events for elementary and high school students.
- Represented the University of Toledo at the NASEC Conference hosted by the University of Pittsburgh.

Participated in professional development workshops and industry tours.

Participated as a panelist for the Professional Development Class & Townhall, Spring 2025.
